An off-grid solar system, also known as off-the-grid or standalone, is a photovoltaic system that has no access to the utility grid. For this reason, off-grid solar systems involve both solar panels and battery storage, so the power can be coming to the building from either of these two sources at any given time -- depending on the solar situation.

A 3kW solar panel system will only provide you with enough electricity to live off-grid if you can be careful with your consumption and use significantly less energy in winter. Summary A 3kW solar panel system is a standard size for a household with two or three bedrooms, and can massively cut your electricity bills.
