A Battery System can make full use of the power generated by your solar panels, ensuring that any unused power is stored on site to be used later when needed. If your electricity is supplied with two rates (a day rate and cheaper night rate), the solar + battery combination ensures that peak rate electricity usage is kept to a minimum.

A 6kW solar system can power most everyday household appliances, help eliminate the dependence on electric grids, and save a chunk on electric bills. On average, the 6kW solar array produces up to 24kWh of electricity, enough to run an average American household for 18-20 hours. However, these can be expensive even after applying state-wise ...
