

Angola green cells group

Could Angola be a new hub for sustainable industrialization in Africa?

With the global push to scale-up green hydrogen production to meet targets required for achieving net zero emissions by 2050, this project has the potential to not only accelerate the clean energy transition, but also to establish Angola as a new hub for sustainable industrialization in Africa.

Who is greencells group?

Click here for our imprint or here for our GTC. A major player in future-proof green energy, Greencells Group builds and operates utility-scale solar projects worldwide.

Can Angola produce green hydrogen?

As Angola offers a special framework and very good options for production of green hydrogen, we believe we have one of the most attractive projects that has a high likelihood of early implementation.

What can Angola do for the world?

By leveraging Angola's abundant zero-emissions energy resources, we plan to supply vital green hydrogen and ammoniato the world, helping to meet critical gateways for industrial decarbonization strategies and targets in Europe and elsewhere.

Who is the National Oil Company of Angola?

Sociedade Nacional de Combustíveis de Angola, Empresa Pública, Sonangol, E.P., founded in 1976, is the Angola's national oil company, responsible for exploring, producing, refining, transportation, storage and marketing of hydrocarbons.

What is Angola Vision 2050?

Working in partnership with Sonangol, Gauff and Conjuncta and the Angolan competent authorities, the project is aligned with Angola's own development aspirations, including the country's long-term "Angola Vision 2050" development strategy, and the current National Development Plan (2023-2027).

Our strategy is to create long-term relationships with partners looking for support in developing their projects. We advise customers from mid-stage development up to the ready-to-build stage. If desired, Greencells can take the full lead of the project, including finance arrangements, and drive the development through its different stages.
