Since 2011, our goal has been to supply the best battery, with the best service, at a fair price. And to have all your battery needs in one place. At Battery Depot we stock over 250 different battery models and types. And the list keeps growing. ...

The winter will obviously be different - I won't have enough solar to run the house or charge the batteries much. I guess in the winter I can get maybe 1/2 a days electricity from charged battery/solar (if I can charge the battery overnight sensibly) so would need to buy 6 to 8kWhr per day. In the height of summer I wouldn't need to buy ...

The battery will help customers store energy during the day, which they can then use in the evening and overnight to reduce their carbon footprint and their bills on a day to day basis. The Shell Solar Storage tariff then brings the same benefits over the course of the year it argues, allowing consumers to save up to \$150.

The annual savings on your electricity bill are based on Good Energy's average Standard Variable tariff rates: 24p/kWh for electricity with a 62p daily standing charge. **Solar Savings Exclusive is a 12-month export tariff available when ...
