????????(?:United States Minor Outlying Islands),????????ISO 3166-1????????????????????,????????"UM"?

To find continent-like seeds, I just check for deep ocean biomes in each direction of spawn. For good biome variety (also because armour trims), I checked for a jungle temple, desert temple, ancient city, and cherry grove within 800 blocks. It still takes a while to find an actually good seed; I spent a whole week searching on and off.

A 127-metre solar tower with a receiver on top absorbs the sunlight reflected from a 12.5ha field of 24,000 motorised mirrors, each two square metres in size, that track the sun as it moves across the sky. Sitting within the solar tower is a steam boiler that heats the seawater to manage the climatic conditions in the greenhouses.

Setting up a bioactive terrarium can be a rewarding and sustainable way to keep certain types of reptiles, amphibians or invertebrates. The concept of a bioactive terrarium is to create a self-sustaining ecosystem where the animals live alongside various microorganisms that help maintain a natural balance.

This study furthers our understanding of ecosystem recovery following blowdown and salvage logging. Results suggest that salvage logging created important differences in coarse woody material (CWM) abundance and height distribution, when compared to un-salvaged areas, and that these differences in turn altered sapling size structure and browsing intensity.
