Bulgaria's Ministry of Energy has released a 240 million BGN (\$134 million) tax rebate program, which allows home users to install solar water heating systems and rooftop photovoltaic systems, which can be

Bulgaria home solar inverter

installed in conjunction with battery energy storage systems. This program can help the country's household users reduce their carbon footprint and lower their electricity bills.

Smart Meter connects to the inverter via the RS-485 interface and reports data on energy consumption from the grid (in case of a solar energy lack) and on the export of energy to the grid (in case of solar energy excess). The inverter uses this data for power regulation and transmits it to the monitoring portal via the Internet.
