

# Casso solar technologies Afghanistan

This allows users of Casso-Solar Technologies and competitive electric infrared heaters to switch to less expensive gas fuel without the need for a completely new installation. For the most precise control of Casso-Solar Technologies Gas Catalytic heaters, closed loop thermocouple feedback control is recommended.

...

This is where Casso-Solar Technologies can help. We specialize in the design and manufacturing of custom infrared (IR) heating systems to meet our customers' needs. Our IR systems are proven to deliver the heat in required wavelengths and minimize the energy consumption in different industrial settings.

Find company research, competitor information, contact details & financial data for Casso-Solar Technologies LLC of Nanuet, NY. Get the latest business insights from Dun & Bradstreet.

Unitube Heater. Unitube heater can be tuned to match the peak consumption point of the material being heated over the usable wavelength range of 2.4-6.0 microns, with emitter temperatures of up to 1800°F. The Unitube provides energy efficiencies of up to 80%, drastically reducing electrical power consumption over competitive tubular heaters.
