Decentralization's Role in Water Resilience. Johan Rockström of the Stockholm Resilience Center warns that while it's popular to centralize water systems, decentralized water systems are frequently more resilient than a single central plant. If one part of a decentralized water system fails, other parts continue operating.

# Central African Republic energy system resilience

Besides deforestation and agricultural practices, the forest ecosystems of the Congo Basin are also endangered by the high wood consumption (fuel wood and charcoal), since over 90 % of households use fuel-wood energy in most countries (de Wasseige et al., 2009, Shure et al., 2012, Eba'a Atyi et al., 2022). Over the last decade, tropical rainforest ecosystems of Southeast Asia ...

2.8 million people - 46% of the Central African population - will be extremely vulnerable, to the extent that humanitarian aid alone will not be enough for their well-being.
