

Chad active energy group

How does Chad generate electricity?

Chad currently generates electricity by consuming oil. With the declining cost of new solar generation plants, the Government of Chad and development partners have prioritized solar power throughout the country. Machinery and parts for electricity transmission and distribution are also in demand. Opportunities

Why is Chad a good place to invest in solar power?

Chad's location in the Sahel, which features brilliant sunshine especially during the dry season, and lack of alternate fuel sources such as coal make solar power an attractive export and investment sector. Chad currently generates electricity by consuming oil.

Can Chad develop a national power strategy?

There are also opportunities to collaborate with the Government of Chad on developing a national power strategy. In March 2019, the Overseas Private Investment Corporation (OPIC), a U.S. Government development finance institution, committed \$10 million to support the introduction of off-grid solar kits and appliances in Chad.

Who are AEG & CoalSwitch ®?

AEG is led by an experienced board of directors based in the UK and North America, with Executive Team based between London and the US. CoalSwitch ® utilises waste materials from lumber operations to create a superior energy efficient product that is a direct drop-in replacement for coal or white biomass pellets.

What makes AEG a sustainable company?

AEG is committed to helping customers achieve their sustainability goals through the production of next generation carbon-neutral fuels. AEG is led by an experienced board of directors based in the UK and North America, with Executive Team based between London and the US.
