Omnis Power was founded in 2010 by a group of entrepreneurs with experience in the energy sector and a common idea: to innovate the renewable energy sector. Arising from several spin-offs of leading companies in the industry, ...

The temperature coefficient of a similar P-type module is -0.35%/°C while that of N-type is modified to -0.30%/°C. This means the power generation performance is particularly outstanding at high temperature. Omnis Solar Power's N type module power will increase with the better temperature coefficient (0.75% higher compared with PERC).
