A brief review of Costa Rica's solar market outlook. Costa Rica, a Central American country, has achieved impressive renewable energy capacity in recent years. In 2019, the nation's renewable energy share hit 99.15%. Looking at this renewable energy share capacity, one may assume that its solar capacity is equally impressive.

This architecture offers the best of both worlds, because having the grid available for emergency use means that you can achieve your needs with fewer batteries and preserve their functionality for much longer. Batteries are expensive and they will not survive well in the environment of Costa Rica if you discharge them too deeply or too frequently.
