How much solar power is available in Kinshasa?

In the area around Kinshasa there is a further 6 gW of solar available at 7 us cents per kW hr. There is also sufficient for the rural areas around Kinshasa, Mbandaka on the Congo river and the main port of Matadi. It can even be exported over the river to Brazzaville.

How much power does DRC need?

Even with new solar and wind DRC could only satisfy between 15 and 55% of total demand. This leaves between 45% and 85% needing offgrid power or 16 gW of installed solar capacity ! Same applies to clean water as only 23% have access.

How much does a solar system cost in West Africa?

The systems in West Africa for which IRENA has data are smaller in size, with correspondingly higher costs per watt, although the larger systems are close to the median value of USD 2.9/W (with little difference for the on- and of-grid projects).

How much does solar PV cost in Africa?

On-grid commissioned and planned utility-scale solar PV projects between 2014 and 2018 in Africa range from around USD 1.2 to USD 4.9/W (USD 1 200 to 4 900/kW). Although Africa is currently home to a very small set of utility-scale solar PV projects, costs have been declining over time.

Will the DRC benefit from the Inga?

Currently the DRC only has 2.5 gW installed and no early benefit from the Inga. However solar and wind is available now. Existing HEP could fill in the 'gaps' when solar is not available. However offgrid power is essential in the rural areas and small towns across this vast country.

Is solar PV a viable option in Africa?

However, it is exciting to see that despite the very early stages of utility-scale solar PV deployment in Africa, and given the transportation and engineering challenges facing infrastructure projects on the continent, it already is possible for projects to have competitive total installed costs and cost structures compared to the global average.

The need to utilize local renewable energy sources in DR Congo has increased due to the unreliability of the state grid and the rising cost of running diesel generators.
