Who is EDF renewables?

EDF Renewables (formerly EDF Renouvelables) is a wholly owned subsidiary of the French utility EDF Group, specializing in renewable energy production. As an integrated operator, the Group develops and finances the construction of renewable energy facilities, and manages operations and maintenance for its own account and for third parties.

How will Ghana improve its electricity sector from 2010 to 2030?

A stronger foundation has been therefore set for further advancement in Ghana's electricity sector from 2010 up to the moment. The aim of the government is to increase the capacity of renewable energy continuously in electricity generation with 10% of the renewable energy in the country's energy mix by 2030 being a target.

What is EDF renewables' second largest business sector?

The photovoltaic solar sector is EDF Renewables' second largest business sector. It currently has solar energy projects in 13 countries with an installed capacity of 2,423 MW, according to own figures. In 2016, EDF Renewables opened the Bolero solar power plant in Chile's Atacama Desert with a capacity of 146 MW.

What happened to EDF renewables North America?

In September 2023, it was announced EDF Renewables North America had sold its 200MW Millers Branch Solar Facility in Haskell County, Texas to the Southern Company subsidiary, Southern Power for an undisclosed amount.

How can Ghana reduce reliance on petroleum fuel?

Ghana has ability to lower the reliance on petroleum fuel through production of its own energy from sources that are renewable. If the right measures are properly taken, the potential renewable resources available in Ghana such as hydropower, solar, wind, biomass, biogas could reduce the current energy demand in Ghana by at least 55%.

How has Ghana established its energy sector?

The results show that the Ghana Government has established its energy sector based on the definition of the key targets in line with the world trend. Ghana is equipped with a vast quantity of renewable energy potentials which include hydropower, solar, wind, and bioenergy.

On the operational side, in 2018 EDF acquired a stake in the French electrolyser manufacturer McPhy to strengthen the Group's industrial expertise. Since 2019, Hynamics, a wholly owned subsidiary of the EDF Group, has been offering 100% low-carbon electrolytic hydrogen production and supply in France and Europe.
