

# Eswatini open range solar

Why is Eswatini's PV market growing?

The biggest driver of growth in Eswatini's PV market comes from private PV projects. In hopes of reaching ambitious goals, Eswatini has made solar panels and batteries exempt from import duties to help with this.

Can solar power help Eswatini achieve its electrification goals?

Although Eswatini's electrification rates are relatively high, they are still a long way off 100% (the country's target for 2022). Solar power is the most viable solution for Eswatini to help meet its electrification goals and save costs down the line.

What is driving Eswatini's growth?

The biggest driver of growth in Eswatini's PV market is private PV projects. In 2022, Eswatini partnered with Frazium Energy to commission a new 100MW solar storage project with 75,000 PV panels, hoping to produce more than 100 million kWh of electricity a year and generate at least 200 jobs.

Does Eswatini have electricity?

Despite being one of Africa's smallest countries, Eswatini has an impressive, diverse topography and climate. Unfortunately, its electricity infrastructure is not reliable.

Who is SegenSolar & what is it doing in Eswatini?

SegenSolar is a leading African independent power producer that is overseeing a ground-mounted project in Eswatini. They are keen to foster the development of additional small and large-scale PV installations across Eswatini. Homeowners can get in touch for more details about their work.

The Kingdom of eSwatini, bordered by South Africa and Mozambique, is the second smallest country on the African continent. It is a landlocked country with diverse climate, from cold and mountainous to hot and dry. Its typical wide open rural landscape is the veld. The Kingdom of eSwatini, as an absolute monarchy, has been ruled by King Ngwenyama Mswati III since 1986.

But scientists only know if solar maximum has happened six months after the event, because they use six months of data analysing the intensity and frequency of sun spots. Current predictions suggest we could reach solar maximum at the end of 2024 or early 2025. For More News And Analysis About Eswatini Follow Africa-Press
