Floating solar photovoltaic (FPV) projects have been gaining attention in recent years. Occasionally referred to by the delightful portmanteau "floatovoltaics", these systems function exactly as the name suggests - an array of solar PV modules are mounted onto floating platforms that are permanently moored in a body of water, usually a lake or ocean bay.

Remote islands in the Philippines. There are homes and establishments in thousands of islands in the Philippine archipelago that can easily be electrified through off-grid solar power.. In a press release on August 2018, Senator Win Gatchalian emphasized his goal of achieving 100% electrification in rural areas of the Philippines, especially in isolated islands and other remote ...

Estimates from the Energy Saving Trust suggest that transitioning to solar power could save the average household between £400-£500 per year. However, the number of people employed in the solar sector needs to sharply increase in order to hit renewable installation targets set for the 2030s, including around 60,000 solar panel installers.

London Stadium, home of West Ham United, will soon be fitted with a 6,500 sq m solar array. Image: London Stadium.
