How do you connect a home battery backup system?

Connect your battery to the inverter, charge controller, and charging source. Next, connect your home battery backup system to your home's existing wiring using a transfer switch (or power input, if available). Once everything is hooked up, your home electrical system should draw from the backup battery the next time a power outage occurs.

How to choose a battery backup for a portable power station?

If possible, select batteries that reach at least double the storage capacity you need so that you can keep them from discharging below 50% capacity. Depending on the battery chemistry, "deep discharging" can negatively impact lifespan and performance. Below are some examples of plug-and-play portable power station battery backup options:
