The Guam Tropical Energy Code (GTEC), adopted and signed into law (P.L. 35-145) on January 2021, establishes minimum energy-efficiency requirements in the design and materials used in construction, reducing the energy needed and lowering energy costs for households in the long-term accordance with GTEC, new construction for all housing in Guam will incorporate ...

The pattern of energy production and use in Guam is shaped by its location, a remote island. Almost all energy is reliant on imports of petroleum products for use in transport and electricity. Guam has no domestic production of conventional fuels such as oil, natural gas or coal. Its economy is dependent on the import of gasoline and jet fuel for transport and residual fuel oil for electricity. One third of electricity produced is used in commercial settings including the leading industry of touri...
