Cyprus is blessed with an abundance of sunshine and electricity costs are relatively expensive. This makes Cyprus an excellent place to utilise solar energy to produce electricity just as it is already used to heat water at most households.. While the daily hours of sunshine are not always plenty - particularly during winter - there are more than 300 days with sunshine in Cyprus.

Harvest Solar will take a look at your electric bill going back 12 months and estimate a custom-sized solar array that fits your specific needs based on annual production and usage.
