

The Energy Policy of the Slovak Republic (Energy Policy) is the strategic document defining the energy sector's primary objectives and priorities to 2035 with a view to 2050. The Energy Policy is a component of Slovakia's national economic strategy given that ensuring sustainable economic growth is conditioned by the reliable supply of price-competitive energy.

Given the important linkages between closing the energy access gap and improving people's health and wellbeing, it is critical to have integrated approaches to health and energy challenges. The global Health and Energy Platform of Action (HEPA) aims to ensure universal access to clean and sustainable energy to protect health. With an initial focus on clean cooking and health ...

This has served to improve its energy security and increase competition on energy markets, according to the International Energy Agency's latest review of the country's energy policies. The Slovak economy's energy intensity has declined in recent years while the share of renewable energy in the primary energy supply has increased.

Slovak NECP was approved by the Slovak Government on December 11, 2019 and subsequently it was submitted to the Commission on December 20, 2019. Slovak national target for GHG in non-ETS sectors is -20% compared to 2002 level. The planned total share of RES for 2030 is 19,2%, which is lower than the EU 2030 goal of 32%.
