

Ico energy Uganda

Who is icopower?

ICOPOWER is an innovative company that, since 2013, has been supporting CEOs, Energy Managers, CFOs and Technical Consultants with patented energy efficiency technologies, with instrumental performance verification and contractual guarantee.

How does icopower work?

ICOPOWER's on-board and remote monitoring system makes it possible to verify the behavior of energy within the plants and the efficiency achieved. ICOPOWER technology is also able to dialogue with other systems and sensors already on the plant and act as a gateway for information gathering.

What is ICO F?

ICO F is Icopower's range for reducing customer grid losses, that is, that part of the energy paid for but dissipated by the system. Grid losses are strongly influenced by excess voltage fluctuations from the grid.

What is icopower doing in 2023?

Icopower finances two hydroelectric projects in Turkey and Brazil, a cogeneration plant in Pakistan, and a solar cooking project in China. In 2023, technology investments have been made to reduce the carbon footprint by using heat pumps for office cooling and heating. Further investments regarding the company's fleet are planned for 2024.
