

Ireland honeywell energy

What can Honeywell do for You?

With end-to-end energy expertise (from source to use), customers can count on Honeywell to help advance their energy agenda. Apply the most advanced technologies with the backing of a trusted energy partner to accelerate the pace of the energy transition.

Why should you choose Honeywell?

No matter where you are on the energy value chain, our ready-now technologies serve energy and industrial companies, and their assets like building portfolios, looking for more profitable, reliable and cleaner solutions. With end-to-end energy expertise (from source to use), customers can count on Honeywell to help advance their energy agenda.

Why should Ireland increase electrification?

Efficient and flexible energy demand from industry can be part of Ireland's plan for the energy transition. An increase in electrification to support the growth of the economy while becoming more energy efficient overall can help us reduce carbon emissions and increase flexibility.

How can we secure Ireland's energy future?

To secure Ireland's energy future, we need a compelling vision of what this will mean to people in terms of their homes, their communities, and their job prospects. That requires all of us to look at all the levers that will enable that to happen.

How will the 2024 energy year impact Ireland?

This could have several implications for the 2024 energy year in Ireland. Opportunities for renewables growth will need to be consolidated with issues like mandates for energy efficiency and accommodating for large energy users. We need to ensure that short-term challenges do not restrict opportunities for long-term growth.

Is Ireland missing out on EU hydrogen funding?

A transport and energy group says Ireland is missing out on millions of euro in potential EU hydrogen funding. Hydrogen Mobility Ireland has carried out research that shows how Ireland can deploy hydrogen to create hundreds of jobs, cut carbon emissions, boost economic growth and achieve energy security in transport.

Ireland's national energy-related emissions in 2023 were at their lowest level in over 30 years. Energy-related emissions in 2023 were 31.4 MtCO₂ eq, down 8.3% on 2022 levels, and lower even than those observed during the height of COVID impacts in 2020. Energy-related emissions fell by over 2.8 MtCO₂ eq in 2023 - the largest annual reduction observed in 12 years.

The European smart home market was valued at USD 22.11 billion in 2024 and is projected to reach USD 29.24 billion by 2029; it is expected to register a CAGR of 5.7% during the forecast period.
