

Jersey good energy solar panels

Jersey's electricity grid is already virtually decarbonised which means installing solar panels will not materially reduce your home's carbon footprint because the electricity produced by solar panels will simply be replacing low carbon grid ...

Powering 5000 homes is the equivalent of generating 36MWp of electricity from various solar voltaic sources - enough to power around 10% of housing in Jersey. Solar currently accounts for less than 0.5% of Jersey's current energy generation. Achieving the Solar 5000 ambition would increase it to 6.5% of the energy share, all generated locally.

Want to know how much solar panels cost?
