What is a 3.5 kW solar system?

A 3.5kW solar system has the potential to reduce electricity bills and contribute to a greener future substantially. A 3.5 kW solar system is designed to produce 3.5 kilowatts(kW) of power under optimal conditions such as full sunlight with no shading or obstructions.

Is a 3.5kW Solar System a good idea?

Solar energy is becoming popular for many people looking to save on electricity bills and use clean, renewable energy. A 3.5kW solar system has the potential to reduce electricity bills and contribute to a greener future substantially.

How much energy does a 3.5kW Solar System produce per day?

Energy (kWh) = 3.5 kW \times 5 h = 17.5 kWh per day This is an approximation, and your actual daily production will depend on the specific conditions at your installation site. The power output of a 3.5kW solar system depends on various factors that can influence its performance.

Can a 3.5 kW solar system save you money?

A 3.5 kW solar system can significantly reduce your electricity bill, with the exact amount of savings depending on your local utility rates and the amount of energy your system generates. If an average daily production of 14-17.5 kWh, you could save between 420-525 kWh per month.
