In 2020, the reformation and renaming of the Company (commonly known then as Kiribati Solar Energy Company) was conducted with the core objective is to broaden its scope in providing services with renewable energy including solar energy, wave energy, wind energy and other RE technologies that is applicable in Kiribati.

In addition to the Table 1 criteria, all three databases were searched for the term "solar system" in place of "solar home system" to ensure that papers that were not using this specific term were also included. Finally, a database of 139 papers that fit the inclusion criteria was created and the articles were uploaded to NVivo, where they were coded and analysed.

Kiritimati Island, in Kiribati's Line Islands group, is the world's largest coral atoll and the largest of the 33 islands in the Republic of Kiribati. The island is approximately 3,300 km east of Kiribati's capital, Tarawa. NETcon also signed a contract to install solar/battery hybrid electricity systems in the Cook Islands.

The South Tarawa Renewable Energy Project (STREP or the Project) will support upscaling of solar power generation in Kiribati. The Project will reduce dependence on fossil fuel imports by increasing the renewable energy (RE) percentage of electricity generation. STREP has three outputs: (i) solar photovoltaic and battery energy storage system installed; ...

Since 1991, the state-owned Kiribati Solar Energy Company (KSEC) has distributed approximately 4,400 home solar systems across 21 of the country's 33 islands and received millions of dollars in development ...

The "Kiribati Solar Photovoltaic (PV) Grid Connected Project" will involve the installation of a 400kWp solar PV system that is connected directly to the South Tarawa electricity grid, which will be the first of its kind for Kiribati. The power generated from the solar PV system will contribute to the supply of approximately 3.7% of the ...

A successful solar home system (SHS) programme should be supported and expanded, the report says. Looking to address challenges at the local level, the roadmap recommends solar desalination in South Tarawa; a combination of wind power, PV and battery storage for Kiritimati Island; and renewable-based refrigeration for fish in the Outer Islands.
