The Elecnova ESS products can be applied in data center ESS projects to offset fluctuations, provide backup power and dynamically expand capacity. Service hotline: +86 021-54396121

Energy storage can jointly control distributed energy resources through EMS and the main grid, to stabilize the fluctuations of distributed energy resources and ensure stable output. It improves the on-site utilization of distributed energy, and prevents transmission pressure and power loss in long-distance transmission.

Industrial Park ESS Solution. The development of the renewable source market has driven the development of ESS industry. Many industrial parks have begun to gradually build ESS to achieve energy efficiency which is

able to reduce energy consumption costs and improve economic benefits through energy arbitrage.
