Will a 150-megawatt solar farm be built in Kosovo?

PRISTINA, May 19 (Reuters) - A group of international and local investors have started to build a 150-megawatt (MW) solar farm in western part of Kosovo as the Balkan country is trying to phase out its dependence from coal. The Solar Energy Group Europe (SEGE) consortium plans to start production within 12 months.

Where will a solar plant be built in Kosovo?

The solar plant is planned to be built in southwestern Kosovo and to come online next year. The CEO of KOSTT, Mustafa Hasani, left, and the director of Solar Energy Group Europe, Egbert Schnuse. Image: KOSTT

Does Kosovo need a new energy sector?

Given this background, the Government of Kosovo has prioritized the modernization and improvement of the country's energy sector, and has asked its development partners, including the World Bank, European Commission, KfW, USAID, as well as other donors, for support and assistance.

What is the New Kosovo power plant?

The New Kosovo power plant is part of the government's plans to reform Kosovo's energy sector. Other plans include closing Kosovo A power station by 2017, rehabilitating Kosovo B power station to meet EU standards, and privatizing the country's electricity distribution system. Plans for New Kosovo also include a lignite coal mine, the Sibovc SW.

How much solar power does Kosovo have?

Kosovo had just 7 MW of installed PV capacity at the end of 2019, according to the International Renewable Energy Agency. The country recently raised its renewable energy target to an additional 400 MW of capacity by 2026. That would be enough to meet a quarter of its power demand and would reduce dependence on aging coal-fired power plants.

Where does Kosovo get its electricity?

Most of Kosovo's electricity is supplied as imports or from two lignite-fired thermal power plants, the 40-year-old Kosovo A Power Station (with a 345 MW generation capacity) near Pristina, and the upgraded, 27-year-old Kosovo B Power Station (540 MW) in Obilic. This content is protected by copyright and may not be reused.

The energy infrastructure in Kosovo has not undergone major change over the past few decades. Due to high reserves of lignite, 97% of Kosovo's electricity generation comes from two aging coal power plants. ...

Kosovo's grid operator KOSTT has revealed that a 150 MW solar park will be built soon, in the municipality
