installation, including rooftop and standalone solar systems. 2 installers based in Saint Kitts and Nevis are listed below.

Saint Kitts and Nevis is located near a large body of water (e.g., ocean, sea, or large lake). This section reports on the wide-area average surface temperature of that water. The average surface water temperature in Saint Kitts and Nevis is gradually decreasing during the winter, falling by 3°F, from 82°F to 79°F, over the course of the season.

So if you buy our solar power system 10kw, it is equal to 14kva solar power system you buy from other supplier. kW is the unit of active power. kVA is the unit of apparent power. Apparent power includes active power and reactive power. The relationship is: $\text{apparent power}^2 = \text{active power}^2 + \text{reactive power}^2$.
