

Laos ies energy solutions

How will IES's MoU affect Lao PDR's monsoon wind project?

This MoU will see also all three parties leverage IES's exclusive development rights issued by Lao PDR to increase the capacity of the current 600MW Monsoon wind project, which IES is developing in the Sekong and Attapeu provinces in Laos, by an additional 1,000 MW. Commissioning is scheduled in 2025.

Who is impact electrons Siam limited?

About Impact Electrons Siam Limited Impact Electrons Siam Limited (IES), is a pioneering renewable energy development firm headquartered in Thailand with over 1,900 MW of wind and solar energy projects in development and operation in Thailand, Japan, Lao PDR and Vietnam.

How will Laos' wind energy project impact the world?

The project, including the expansion, could offset over 90 million tons of carbon dioxide throughout its lifetime. This collaboration for wind energy projects, including other potential renewables, like solar and biomass, will diversify Laos' main source of renewable energy generation - hydropower, which is mainly generated during wet season.

What will IES do with the monsoon wind power project?

This MOU will see also all three parties leverage IES's exclusive development rights issued by the Government of Lao PDR to increase the capacity of the current 600MW Monsoon Wind Power Project, which IES is developing in the Sekong and Attapeu provinces in Laos, by an additional 1,000MW.

Why is ies partnering with Envision & Keppel?

Mr Peck Khamkanist, CEO of IES stated, "We are pleased to be a part of this collaboration together with other leading energy solutions providers, Envision and Keppel, to further our aim of contributing to the global quest against climate change, starting from our home region.
