A UPS (Uninterrupted Power Supply) is a backup battery that keeps the equipment plugged into it running in the event of a power outage. It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down.

This product has 425VA and 225W battery backup power supply and comes with 6 outlets, 4 of which have UPS battery backup and surge protection and the other 2 with surge protection only. Generally, home backup power refers to a set of electrical systems that provide an emergency electricity source during times of power outage. They usually come in the form of power stations or solar generators. When an outage happens, the backup power supply can be used to power basic home appliances, such as fridges, microwave ovens, and so on.
