Is reliable energy the key to sustainable growth in Liberia?

The World Bank today released the fifth edition of its annual Liberia Economic Update, titled Powering Growth with Reliable, Affordable, and Sustainable Energy Access. The report offers a comprehensive analysis of recent economic developments in Liberia, underscoring the crucial role of reliable energy in fostering sustainable growth.

Does Liberia have an economic update?

For details, please read the Liberia - Economic Update : Fifth Edition- Powering Growth with Reliable, Affordable and Sustainable Energy Access. The World Bank today released the fifth edition of its annual Liberia Economic Update, titled Powering Growth with Reliable, Affordable, and Sustainable Energy Access.

What is happening in Liberia's energy sector?

The update highlights key advancements in Liberia's energy sector, including notable progress in power generation and the expansion of energy access. However, despite these gains, the country faces significant power shortages, calling for substantial investments to achieve reliable, affordable, and sustainable energy access for all Liberians.

What is the cost of electricity in Liberia?

The tariff on generator usage in Liberia is estimated to be approximately US\$3.96/kWh, which is around 14 times higher than the LEC tariff, according to Options for Development of Liberia's Energy Sector. The document also mentions that the consumption of thermal energy in the form of charcoal and firewood costs Liberia about 960,000 trees per year.

What is the primary energy consumption in Liberia?

In Liberia, more than 80% of the primary energy consumption comes from biomass. Most importantly, woody biomass is used for domestic cooking and heating. In 2004, it was estimated that over 95% of the population depends on firewood and charcoal for cooking and heating needs and palm oil for lighting. Energy consumption in Liberia is dominated by biomass.

What is the real cost of Liberia's energy crisis?

The tariff on generator usage in Liberia is estimated to be about US\$3.96/kWh, which is approximately 14 times as high as the LEC tariff. Additionally, the consumption of thermal energy in the form of charcoal and firewood is costing Liberia about 960,000 trees per year. This information does not constitute an endorsement by MCC of any kind.
