Visok porast stetnih gasova je doveo do povecanja CO2 u atmosferi sto ima za uticaj promenu temperature na nasoj planeti. Ako mislite da je 2-3 °C mala promena, setite se samih sebe kada imate malo povisenu temperaturu, preko 4 stepena vise nego normalna i vi ste gotovi, isto tako je i za planetu! Solarna energija kao takva je sasvim cista i ne zagadjuje planetu za razliku od ...

With many sunny days, Serbia has great potential for solar energy. However, the use of solar power in residential buildings and individual houses is still in its early stages. The country's recently adopted energy laws, ...

The lowest solar bid, announced in August 2023, was EUR0.08865/kWh. Serbia has announced development of several large-scale solar projects this year, including a deal for 1 GW of solar across six sites and a 1 GW solar panel factory. Work is also underway on state utility Elektroprivreda Srbije's first solar project.
