

The energy mix in Mauritius is dominated by coal and oil. Almost 10% of the country's final energy consumption is generated by modern renewable sources of energy - a share that has gradually decreased for the past 20 years.

Africa Clean Energy Solutions Limited, through its subsidiaries, provides clean energy solutions in Mauritius, United Kingdom, Namibia, Uganda, South Africa, and Kenya. It produces energy using solar, biogas photovoltaic, and biomass, as well as operates various projects. The company was incorporated in 2017 and is based in Ebene, Mauritius ...

Mauritius is located in the southwest of the Indian Ocean, off the eastern coast of Madagascar. With a population of 1.2 million for a total surface area of 1865 km², Mauritius has one of the highest population densities in the world (SM, 2011). The country depends highly on imported fossil fuels for its primary energy requirements, with 84% consisting mostly of coal ...

The government's energy policy encourages the use of renewable and clean energy to reduce the country's dependence on fossil fuels and decrease greenhouse gas emissions. Official statistics for 2020 indicated that the percentage of renewables used for electricity generation was 23.9 percent, compared to 21.7 percent in 2019.

Promoting Renewable Energy and creating an environment conducive to the development of Renewable Energy · The Mauritius Renewable Energy Agency (MARENA) is a body corporate, owned by the Government of Mauritius, which operates under the aegis of the Ministry of Energy and Public Utilities (MEPU) and is regulated by the MARENA Act of 2015. MARENA was set ...

MARENA is empowered, among other things, to oversee and promote the development of renewable energy in Mauritius, including research and innovation. In 2017, the CEB Act was amended to allow CEB (Green Energy) Co Ltd, whose function is to promote renewable energy, to participate in power projects without having recourse to public procurement.

To achieve the target of 35 percent renewable energy by 2025, Mauritius plans to commission six more solar farms. As of mid-2019, the total capacity committed for solar stood at 125.5 MWdc, of which 105 MWdc is owned by the private sector.
