In this webinar, industry experts in hi-rel power electronics design, packaging, testing, and qualification of hybrid and space-grade PCB DC-DC power supplies, will provide the latest options and the best practices in realizing the optimal power suppliers for today's high-reliability applications. Recorded May 2nd, 2024. View Now

Micross high-reliability products and services include hermetic multichip module packaging, advanced 3D Heterogeneous Integration, ASIC design, and the many other high-reliability product solutions and value-added services that enable the size, weight, and power optimization desired for critical electronic systems and devices.

Micross" Hi-Rel Power Solutions design center in Herlev, Denmark, provides product services for spacecraft power system designs and complex power conversion system solutions. Decades of heritage in high-reliability applications have strengthened our unwavering commitment to deliver nothing but the very best in power management solutions to ...

Acquisition Expands Micross" High-Reliability Power Management Solution Capabilities. Melville, NY - February 28,2023 - Micross Components, Inc. ("Micross" or the "Company"), a leading provider of high-reliability microelectronic product and service solutions for aerospace, defense, space, medical and industrial applications and a portfolio company of Behrman Capital, today ...

New Hi-Rel DC-DC PCB Design & Manufacturing Facility . October 2024 - Micross" new Hi-Rel DC-DC PCB design and manufacturing facility in Ballerup, Denmark offers unparalleled support and capabilities servicing the defense and space markets. Micross Hi-Rel Power provides a comprehensive portfolio of standard models supporting all major satellite ...

Micross Hi-Rel Diodes facility in Reynosa, MX, less than 4 miles from the US border, was completely upgraded with the latest fab equipment, new infrastructure, and cleanrooms, providing expanded capabilities for custom low-rate production, as well as high volume full-rate production. November 20, 2024. View Now

Micross hi rel power solutions Denmark

Micross Hi-Rel Power Solutions is a trusted expert in high-reliability DC-DC converters, offering a broad portfolio available in a wide range of packages for space, ... Denmark for spacecraft power system designs and complex PCB based power conversion system solutions. Decades of heritage in high reliability applications signify the company's ...

Juridisk navn Micross Hi Rel Power Solutions ApS CVR-nr 27489524 CVRP-nr 1010275497 Startdato 17.12.2003 Selskabsform Produktionsenhed Antal ansatte 28 NACE-branche 721900 Anden forskning og eksperimentel udvikling inden for naturvidenskab og teknik

Micross Hi-Rel Power Solutions is a leader in power management solutions for high reliability and space applications. Located in San Jose, California and support by design centers in Herlev, Denmark Support

Maximizing DC-DC Power Supply for Space Webinar Recording. In this webinar, industry experts in hi-rel power electronics design, packaging, testing, and qualification of hybrid and space-grade PCB DC-DC power supplies, will provide the latest options and the best practices in realizing the optimal power suppliers for today's high-reliability applications.

Maximizing DC-DC Power Supply for Space Webinar Recording. In this webinar, industry experts in hi-rel power electronics design, packaging, testing, and qualification of hybrid and space-grade PCB DC-DC power supplies, will ...

Martin is the Product Line Director of Micross Hi-Rel Power PCB Solutions, located in Denmark. Prior to joining Micross, Martin served as the Director of R& D Engineering for International Rectifier HiRel Products Denmark along with power electronics R& D management and senior design engineering roles at IR HiRel and ICEpower.

\$134.3M DoD Contract Expands Micross Advanced Interconnect OSAT Capabilities in the US Press Release. Micross has been awarded up to \$134.3 million by the DoD under the IBAS Cornerstone RESHAPE program to develop trusted, pure-play and open-access Advanced Packaging capabilities and capacity for low-volume/high-mix production of secure 2.5/3D ...

Micross is the most complete provider of advanced, high-reliability microelectronic products and services. With the broadest authorized access to die & wafer suppliers, an extensive portfolio of hi-rel power, RF, optoelectronics, memory, data bus, logic, and SMD/5962 qualified products, and the most comprehensive advanced packaging, assembly, modification, upscreening, and test ...

In this webinar, industry experts in hi-rel power electronics design, packaging, testing, and qualification of hybrid and space-grade PCB DC-DC power supplies, will provide the latest options and the best practices in realizing the optimal ...

Micross Hi-Rel Power Solutions Located in San Jose, California, the facility is DLA certified Class K to

Micross hi rel power solutions Denmark

design and manufacture ruggedized hermetic hybrid DC-DC converters. The group is augmented by design centers in Herlev, Denmark for spacecraft power system designs and complex PCB based power conversion system solutions.
