What is Montserrat energy policy 2016-2030?

(Montserrat Energy Policy 2016-2030). In-country commitment is vital for the success of partnership projects: The lead partner in Montserrat, the Energy Unit at the Ministry for Communications, Work, Energy and Labour (MCWEL), facilitated the engagement with other organisations.

Who provided the power data for the solar PV project in Montserrat?

The power data was kindly provided by the Government of Montserrat. Figure 16: Placard for the 250kW solar PV project in Montserrat. Renewable Energy planning in Montserrat

Why should Montserrat invest in re-sat projects?

The RE-SAT projects has provided the Government of Montserrat with a new renewable energy platform that has been used to support their transition to renewables and a climate resilient future. Montserrat has a vision of achieving 100% renewable energy grid penetration by 2030.

Does Montserrat need a geothermal plant?

To go beyond this, Montserrat is developing plans to ensure the electricity system can operate reliably. The target of 100% was based on information provided from the 2010 geothermal study<sup>4</sup>, and an Early Market Engagement exercise in 2017 to procure a 2.5-5MW geothermal plant which would satisfy 100% of the Montserrat energy requirement.

Can wind energy be implemented in Montserrat?

Although wind energy has not yet been fully re-explored in Montserrat, a desktop study using RE-SAT wind resource maps was conducted to determine suitable locations for the implementation of wind energy. The outcome of this study was included in their first Environmental Statistics Compendium<sup>6</sup> in Montserrat, which was published in 2020.

How has re-sat impacted Montserrat?

A significant early impact that RE-SAT has had in Montserrat include: 1. The development of a wind resource evaluation to explore the potential for wind. 2. The exploration of potential scenarios to achieve 100% renewable penetration and testing the results from an Integrated Resource Plan conducted by external consultants.

## Montserrat tema energy

From 2012 until 2017, Montserrat made a push towards geothermal as a potential source for powering the island. Geothermal was the Government of Montserrat's (GoM) first thrust into implementing renewable energy (RE) technology. To date, the government has drilled three wells, namely MON1, MON2 & MON3.

Researchers from the United Kingdom flew out to Montserrat this June to investigate the volcanic island's potential as a source of geothermal energy and critical metals. The six members of the Oxford Martin Programme on Rethinking Natural Resources aim to help build a system to make the most of Montserrat's natural resources.
