Penso Power and Luminous Energy, partners in the Welbar Energy Storage joint venture, have secured full planning approval for a 350MW connection capacity battery storage development at Hams Hall, east of Birmingham and close to the M6 Toll in North Warwickshire.

In 2022, New Caledonia's electricity consumption was heavily reliant on fossil fuels, making up more than 80% of the total energy mix. Coal was the largest contributor within this category, accounting for about half of the total electricity use. On the other hand, low-carbon or clean energy sources played a smaller role, constituting just under 20% of the electricity consumption.

The Energy Transition Plan (STENC) defines New Caledonia's energy strategy for 2030. Adopted in June 2016, it constitutes the policy framework applicable until 2030. the STENC is structured around three main components: an extensive energy saving program, development of renewable energy to improve New Caledonia's energy self-sufficiency and a ...

University of Birmingham Enterprise announces the launch of Biocell Energetics, to provide profiling and testing services that assess, in real-time, how living cells produce energy.. The venture is founded by Dr Jonathan Barlow, Scientific Research Director at Birmingham's Cellular Health and Metabolism Facility at the College of Life and Environmental ...
