

New Caledonia wiiq energsys

What is EnerSys Wi-IQ battery monitoring system?

EnerSys introduces its Wi-iQ battery monitoring system which collects performance data for peak battery performance. The EnerSys Wi-iQ battery monitoring system helps you power your battery fleet more productively and profitably.

How does EnerSys Wi-IQ work?

in wireless technology. Installed directly on the battery harness, the Wi-iQ device communicates with remote sensors on the battery to capture and continuously share battery operating data via Bluetooth with all EnerSys battery op

What is New Caledonia Energy?

New Caledonia Energy is the entity responsible for developing the project for the new power station that will supply the energy for Société Le Nickel (SLN). The current power station is nearly 50 years old and is highly polluting. The ultimate goal is to have a carbon-neutral plant by 2030, which would be a world first in the mining sector.

What is EnerSys Wi-IQ report?

EnerSys has developed its Wi-IQ Report, a customer reporting suite which enables you to keep on top of your battery fleet's performance. You can up-load data from all your Wi-IQ devices and analyse a single battery or compile reports by battery/truck family to assess your utilisation.

What is EnerSys Wi-IQ?

EnerSys Wi-IQ has the ability to communicate wirelessly to download the battery key information for better diagnostics and service. The information Keeping your electric materials handling equipment on the move is fundamental to maintaining your business operating efficiently.

How do I contact EnerSys?

For service, contact your EnerSys sales representative or visit Page 12 Tel: +65 6416 4800© 2023 EnerSys. All rights reserved. Trademarks and logos are the property of EnerSys and its affiliates except Bluetooth, Loctite, Noalox, CE, UKCA, Zigbee, iOS and Android, which are not the property of EnerSys.

The E Connect app is an EnerSys designed smart device application developed by our specialist software engineers. This app connects to our proprietary WiiQ3 & 4 data loggers and iQ / + Modular & COMpact chargers. It allows the user to easily connect, download and analyse battery and charger data through simple bluetooth connectivity. ...

At the core of EnerSys's power management, the latest Wi-iQ battery monitoring device features a slim design for easy installation on the battery harness and combines battery monitoring ...

The battery is fitted with a WiIQ onboard battery monitoring device. The WiIQ is suitable for a voltage range 24V - 80V. These devices capture battery operating data for later reporting and analysis whilst at the same time offer visual warnings to the operator on the current status of the battery - refer table below.

Ottieni il massimo dalle tue batterie. Combinando la nostra esperienza nel monitoraggio della batteria con la recente tecnologia wireless, il dispositivo di monitoraggio della batteria Wi-iQ monitora una serie di dati di funzionamento della batteria, tra cui ampere (AH) di carica/scarica, temperatura, tensione e livello dell'elettrolita (tramite un sensore esterno opzionale).

At the core of EnerSys's power management, the Wi-iQ battery monitoring device combines our battery monitoring expertise with the latest in wireless technology. Installed directly on the ...
