

# Nexus energy solutions Nepal

How can Nepal benefit from the W-E-F nexus planning framework?

Nepal can immensely benefit from the W-E-F nexus planning framework because of its holistic and more cost-effective approach and its inherent potential to address the challenges of resource scarcity and climate change, maintain sustainable growth, and meet the ever-increasing demand of growing population.

Do countries need a W-E-F nexus approach to development planning?

This suggests that countries in the region need to adopt the integrated W-E-F nexus approach to development planning that not only ensures the water, energy, and food securities for the people but also protects the larger landscape level ecosystems and maintains the resilience of these resources.

Can developing countries ignore the W-E-F Nexus framework?

It argues that the developing countries whose economies are primarily dependent on the natural resources cannot afford to ignore the W-E-F nexus framework to meet the growing needs of water, energy, and food and the sustainability of the natural resource base for the current and future generations.

What are the benefits of W-E-F nexus approach?

The key benefits of W-E-F nexus approach can be perceived in terms of maintaining these natural capitals' productivity, synergy, and the protection of natural ecosystem which is essential to accomplish the SDGs and ensure equity and fairness for future generations.

What should be included in Nepal's Water Resource Development Policy?

Nepal government's water resource development policy should incorporate water, energy, and food production in the design of high dam multipurpose hydro-energy development projects so that provision for hydro-energy, irrigation infrastructures for food production, flood control, and drinking water can be integrated and built.

Can the W-E-F Nexus framework be extended?

If the W-E-F nexus framework can be extended in the design of multipurpose and mega-hydro-projects considering water, energy, and food, these could bring revolutionary economic transformation of the country through the development of agriculture.

NES has a highly experienced leadership and tech servicing team and offers customers a full suite of products and services for fuel dispensing and equipment, point of systems, and fuel tank/line/pad construction and installation.
