BESS availability is just as important for owners and operators who are not providing grid services but are engaging in energy trading. To take advantage of price -demand, the energy storage system must be reliable. It must be available when required and perform to its optimal potential, otherwise trades could be interrupted or rendered unviable.

It is available in different sizes: QS and QL, ranging from 200 kVA to 2,000 kVA, and from 312 kWh to 2,084 kWh, and QG for grid scale storage needs, ranging from 4,400 kVA and 4,470 kWh to virtually any size ...

Irish state-owned electricity company ESB has opened a 150MW/300MWh battery energy storage system (BESS) at its Aghada site in Co Cork. The project is the latest step in ESB's commitment to investing EUR300 million (£251 million) in battery storage technology. Its first BESS site launched in 2022, a 19MW/38MWh project also located in Aghada.
