

North valley solar power Bolivia

How can Bolivia improve energy production?

Bolivia continues to make efforts to upgrade the infrastructure needed for renewable energy production. The National Interconnected System (SIN), which the government has put in place, aims to improve the nation's capacity for producing electricity by building additional power plants, transmission lines and substations.

Does Bolivia have a country Factsheet?

Specifically for Bolivia, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

Is Bolivia part of relac?

For instance, Bolivia is part of RELAC, an alliance between Latin American and Caribbean countries for renewable energy development. One of its aims is for renewable energy to reach 70% of the regional electricity matrix.
