Maputo, Mozambique, located in the Southern Sub Tropics, is a pretty good spot for generating solar energy all year round. The amount of energy you can get from a kilowatt of solar power varies throughout the year. In summer you can expect about 6.14 kilowatt-hours per day, in autumn it's about 5.48 kilowatt-hours per day, in winter it drops to 4.31 kilowatt-hours per day ...

If so - and you own solar panels, then it is YOU that needs to carry out some checks. With respect to the letters, bin them - they are not genuine no matter how legitimate they look. If the callers are pushy or say that they have someone in the area, or that they are calling from MCS, Ofgem, The Government or even us, then you need to request the 6 points below immediately:
