

What is open solar contracts?

Open Solar Contracts is an initiative which streamlines project development and finance processes by offering legal agreements that make contracting faster and less costly. Standardised contracts include Power Purchase Agreement, Implementation Agreement, O&M Agreement, Supply Agreement, Installation Agreement and Finance Facility Term Sheet.

What is a solar contract?

Solar Contracts are fine-tuned for small and medium-sized, grid-connected solar PV projects. Standardised contracts include: Power Purchase Agreement, Implementation Agreement, O&M Agreement, Supply Agreement, Installation Agreement and Finance Facility Term Sheet. These are complemented by the Implementation Guidelines.

What are standardised solar contracts?

Standardised contracts include: Power Purchase Agreement, Implementation Agreement, O&M Agreement, Supply Agreement, Installation Agreement and Finance Facility Term Sheet. These are complemented by the Implementation Guidelines. Open Solar Contracts review phase is now over.

Are open solar contracts a good investment?

The Open Solar Contracts provide for a standard insurance package, but national regulations can have a very significant impact on the scheme to be implemented, with high cost consequences. The standardisation of insurance schemes is a key factor of bankability and risk management cost mitigation.

How are open solar contracts drafted?

The Open Solar Contracts are drafted on the assumption that the buyer is a national or local government-owned or government-controlled utility (but this also can be extended to private buyers authorised by the government). Furthermore, the offtake is assumed to be guaranteed in some form.

Will Irena & Twi update the open solar contracts templates?

Based on any applicable feedback, IRENA and TWI may occasionally issue revisions of the Open Solar Contracts templates and other related materials.
