

Pakistan brim energy

Why did Pakistan lose a lot of energy?

Previously, the country suffered from severe energy shortfalls causing 6-12 hours of load shedding, affecting both domestic and commercial users. These prolonged outages added to the plight of the economy of Pakistan and triggered a fall in exports, the drop of the rupee against the dollar, inflation and balance of payment crises.

How CPEC is transforming the tourism industry of Pakistan?

Notably, the signing of free trade agreement - effective January 2020 - between China and Pakistan have made 2020 a landmark year for CPEC where Pakistani commodities like cotton, leather, garments and rice gained substantial demand in Chinese markets. Moreover, CPEC is revitalizing the tourism industry of Pakistan.

Does Pakistan need regulatory reforms?

Also, Pakistan needs regulatory reforms to encourage further investment from China and beyond. Institutional reforms might attract diverse and sustainable inflows of FDI and ensure the longer-term economic sustainability of CPEC, promoting inclusive growth and broader economic trajectory in Pakistan.
