Energy efficiency With HRV Hokkaido from Passiv Energie, you are choosing the most energy-efficient ventilation system imaginable. Not only does it recover up to 95% of the heat from the exhaust air and use it to heat the supply air, it also has the lowest power consumption of all ventilation units with heat recovery.

The integrated ceramic heat storage unit achieves a heat recovery of 95%, preserving heating energy and significantly reducing heating costs. The HRV Hokkaido from Passiv Energie ...

In Ecuador's green buildings, a combination of passive and mechanical ventilation systems ensures adequate air circulation while minimizing the use of energy-intensive cooling systems. Natural ventilation techniques, such as cross-ventilation and stack effect, are employed to harness the natural airflow and maintain comfortable indoor temperatures.
