

# Peru sun storagetek 6100

What type of drive does the Sun StorageTek 6140 use?

The Sun StorageTek 6140 array supports both 4-gigabyte and 2-gigabyte Fibre Channel (FC) or Serial Advanced Technology Attachment (SATA) disk drives. Although you can mix drive types in the same tray, for optimal performance, Sun recommends that all disk drives in a tray must be of the same type.

How do I register an array in Sun StorageTek?

Click an array name to see the array details. TABLE 2-5 describes the buttons and fields on the Storage System Summary page. Click to launch the Register Array wizard to designate a new storage system to be managed by the Sun StorageTek Common Array Manager software. Click to remove the selected array from the registry.

What is the Sun StorageTek access volume?

The access volume, which is mapped to LUN 31, is listed only on the Mapping Summary page and is created on the Sun StorageTek 6140, Sun StorageTek 6540, and Sun StorageTek 2500 series arrays for communication between in-band management software and the storage array.

Does Sun Storage 6180 support RAID 6?

Note: RAID-6 is available for the Sun Storage 6180, 6580, 6780, Sun StorageTek 6140 array, and Sun StorageTek 2500 Array series. Note: When you assign RAID-1 to a virtual disk having more than two drives on arrays with two or more physical disks, the firmware automatically assigns RAID-1+0 to the virtual disk.

What is the Sun StorageTek 6540 array?

The Sun StorageTek 6540 array is a disk storage solution provided by expansion trays only. An expansion tray is a storage tray that has disks only and no controller. It is cabled directly to a controller tray and cannot operate independently.

How to display FRUs in Sun StorageTek common array manager?

To display FRUs in Sun StorageTek Common Array Manager, follow these steps: 1. Click Sun StorageTek Common Array Manager. The navigation pane and the Storage System Summary page are displayed. 2. Expand the array for which you want to display FRU information. The navigation tree is expanded for that array. 3. In the navigation tree, expand 'Troubleshooting' and choose 'FRUs'. The page is displayed for the selected array.

Worked at the StorageTek office in Ann Arbor, Michigan in the late 90"s. We had one or two of these huge tape libraries in our office, which was super cool. Sadly this was right in the era where Linux was really gaining steam in the Enterprise, so while StorageTek once supported dozens of different platforms, the company had whittled support down a ton.
