The global biological value of the marine ecosystems of the Pitcairn Islands is outstanding, and deserves strict protection and recognition. A large no-take reserve, while allowing for traditional small-scale uses, conserves this unique environment, attracts scientific and conservation interest in studying and protecting the area, and also increases tourism to the islands, all of which ...

The Pitcairn Islands group includes Pitcairn, Oeno, Henderson, and Ducie Islands, all surrounded by a vast Marine Protected Area. Pitcairn, located in the South Pacific, stands as one of the world's remotest inhabited islands, with a sub-tropical climate. It's renowned as the settlement chosen by the mutineers of HMAV Bounty in 1790.

Modern materials have made their way to the island, allowing for more durable construction. However, the essence of Pitcairn's architectural identity remains intact. The community's commitment to sustainability and self-sufficiency is evident in their use of solar panels and rainwater harvesting systems. Public Structures and Community Spaces

In fact, we've seen a 300% increase in solar panel projects uploaded to our site in the last couple of years. There have been a huge number of community centres, leisure centres, schools and village halls that have applied for community crowdfunding to put solar panels on their roofs and install batteries to improve their energy supply and save money
