

Portugal grid intelligence

Is there a grid code for Portugal?

Since a grid code for Portugal is not defined, then it unless you know what grid standards your country follows your only options will be None or Other, depending on your feedback laws. Hi Alexandra, Thanks for your answer. I end up choosing other cos with "none" selected I could not configure the ESS Assistant. Best Carlos @Cadoxa

What makes Eneida A great grid enhancing technology?

Eneida fits perfectly into this grid enhancing technology: they offer proven solutions (hardware & software) to distribution grid operators (DSOs) to obtain a detailed real-time view complemented with active grid management tools", according to Dirk Dewals, Managing Partner. "We are glad to support Eneida in its growth path.

What is Eneida deepgrid?

Eneida's Operational Analytics platform-- eneida DeepGrid, integrates smart sensor networks with data analytics and follows an open, modular, and interoperable architecture. It supports the integration of third-party sensors and third-party applications.

What are the main sources of electricity in Portugal?

On an annual basis, wind and hydropower were the leading sources of electricity generation in Portugal in 2023. With more than half of its electricity coming from these sources, the country's reliance on fossil fuels is decreasing. Discover all statistics and data on Electricity in Portugal now on [statista.com](https://www.statista.com)!

Itron's grid edge intelligence portfolio unlocks the power of your data to provide more visibility and control than ever before. Enabled by distributed intelligence technology, Itron's Grid Edge Intelligence portfolio empowers utilities with greater visibility and control at the edge by connecting, detecting, operating and controlling devices to deliver an efficient, optimized and ...

The optimisation of the electric grid assets Big Idea A Eneida.io desenvolveu a plataforma de Operational Analytics, eneida DeepGrid. Uma plataforma aberta, modular e colaborativa, que combina redes de sensores inteligentes com ciência de dados, permitindo aos operadores de distribuição e suas equipas operacionais otimizar a gestão da sua rede de Baixa Tensão. Os

The Alliance for the Energy Transition aims to strengthen the competitiveness and the resilience of Portuguese Energy sector's companies. The consortium will contribute for increasing the creation of innovative products and solutions, based on technology and know-how developed and consolidated in the sector, placing Portugal at the forefront of decarbonization and fostering an ...

Cutting-Edge AI technologies ready to change the landscape in GI practice. Wide scope in digestive healthcare, comprising technologies for both digestive and pancreatobiliary tracts, as well as ...

Distributed intelligence moves grid analysis, decision-making and control to the grid's edge, resulting in significantly reduced latency, greatly improved situational awareness, more accurate analysis and advanced event detection. This results in grid optimization, enhanced asset management, DER integration and more informed and engaged ...

Fuel-cycle emissions intensity associated with the electricity generation in Portugal. The factors are computed using the life cycle emissions intensity corresponding to fossil fuels uranium and biofuels fuel-cycles weighted by the respective shares of all fuels/technologies in the generation mix. ... Electricity supplied from grid: T&D losses ...

Making the electric grid fit for new clean technologies, like solar panels electric vehicles or batteries, is critical to avoid congestion and electrical faults. DSOs are demanding ...

According to the EUStartups Eneida, a pioneering company in Neighbourhood Grid Intelligence for Zero Emission Neighbourhoods (ZEN), founded in 2012 and based in Coimbra, has announced the successful completion of its EUR10.5 million Series B financing round. This new funding will enable Eneida to extend its market leadership, accelerate ...

Eneida.io has developed Eneida DeepGrid: an Operational Analytics platform combined with a smart sensor that will enable each neighbourhood grid and the operators that run it, to sense, ...

Considera o evento mais importante dedicado à transição energética - o Enlit Europe 2024, decorreu de 22 a 24 de outubro. Durante estes dias no fórum, que contou com cerca de 15.000 participantes, mais de 700 expositores internacionais e mais de 500 oradores, foram abordados todos os aspetos da agenda energética, sessões de Hub orientadas por ...

It also forms part of the broader smart grid programme to support the energy transition and the meeting of Portugal's climate targets, including incorporating 47% of energy from renewable sources into gross final energy consumption and reducing greenhouse gas emissions between 45% and 55% compared to 2005 by 2030.. Primary energy consumption ...

ICIS modelling shows that Portugal will produce sufficient renewable generation to satisfy its domestic demand by 2030 and 150% by 2040, driven by strong wind and solar growth in the country. This results in a ...

Portugal grid intelligence

Road to ZEN - Neighbourhood Grid Intelligence for ZERO EMISSION NEIGHBOURHOODS. eneida.io has developed eneida DeepGrid™: an Operational Analytics platform that enables the operators that run the neighbourhood grid to sense, optimise and control it, so they can enable more electric vehicles, more heat pumps, and to install more solar panels in consumers' roofs, ...

Bidgely, a leading global energy intelligence company, drove momentum for profitability in 2024 by quadrupling revenue for its grid products. This included a rise in demand for the company's EV ...
