I recently researched solar panels replacing the conventional electric. In India It'll take about 3 to 3.5 lakhs for 5kw of setup for solar panels including UPS, batteries and circuits. 1kw of solar panels will generate 4-5 units of electricity a day. So, my calculation is a regular home in India that consumes at least 250 - 300 units in a month.

Panels are then placed parallel to each other and directly feed AC from the roof down to the house. Other systems place panels in series, so-called "strings", feeding one large inverter, that usually sits inside the house. The first option has the advantage of panels being parallel whereby shading on one panel does not hamper the others.
