What is a Tesla Powerwall?

The Tesla Powerwall is a solar battery system designed to store the energy generated by the solar panels, or solar roof tiles installed on your home. Homeowners can use the Tesla Powerwall during the evenings, low-sunlight days or when the power grid fails.

What is a Powerwall battery?

Powerwall is a compact home battery that stores energy generated by solar or from the grid. You can use this energy to power the devices and appliances in your home day and night, even during outages. With customisable power modes, you can optimise your stored energy for outage protection, electricity bill savings and more.

Why should you use a Powerwall in the UK?

With energy costs in the UK on a seemingly relentless rise, the Powerwall offers a way to control electricity bills. By storing excess solar energy, homeowners can protect themselves against peak time charges. The UK's climate, known for its variable weather, can make solar panel efficiency unpredictable.

How many kWh is a Powerwall 3?

We're here to provide impartial guidance, with no pushy sales! Powerwall 3 boasts a useable capacity of 13.5kWh. After full analysis of over 600,000 Powerwall installations, Tesla found 13.5kWh is the optimum capacity to provide a day's backup for most homes.

How much does a Tesla Powerwall cost in the UK?

The cost of the Tesla Powerwall 2 in the UK today is around £5,800. However, you will also need to account for installation costs and any supporting hardware you might require. Adding these components to the cost of the Tesla Powerwall unit, your total expenses can range anywhere from £7,100 - £9,300.

How much power does a Tesla Powerwall 2 use?

The average household uses around 10 kWh (kilowatt hours) per 24-hour period (and much less if using solar power during a sunny day). This means that your Tesla Powerwall 2 could potentially power your home for at least a day with its 13.4 kWh of battery storage, from a full charge.
