

Prime battery technologies Bolivia

Who is prime batteries technology?

Prime Batteries Technology, a breakthrough developer, manufacturer and distributor of lithium-ion batteries and bespoke storage systems, has signed an investment agreement today with EIT InnoEnergy, the innovation engine for sustainable energy supported by the European Institute of Innovation & Technology (EIT), a body of the European Union.

What makes Prime batteries technology unique?

PRIME Batteries Technology's comprehensive approach to energy storage combines a strong focus on sustainability, innovative smart factory and digitalization strategies, and a dedication to reducing production costs through optimization and innovation.

What is prime batteries technology's smart factory & digitalization strategy?

PRIME Batteries Technology's smart factory and digitalization strategy represent a forward-thinking approach to modern manufacturing, embracing the potential of connected systems, advanced technologies, and data-driven decision-making.

Why did EIT InnoEnergy invest in prime batteries technology?

The investment formalises EIT InnoEnergy as a shareholder in Prime Batteries Technology that will support the company in achieving its ambition to scale up annual production output to 8GWh, attracting and accessing talent, and paving the way for it to become one of the success stories of the European battery value chain.

Does Prime batteries technology have a potential IPO?

Mr. Adrian Polec, one of Prime Batteries Technology's founders and shareholders, shared key insights in a recent interview with the Romanian news platform Financial Intelligence. He highlighted our focus on completing the factory expansion to 2GWh capacity and discussed a potential IPO on the Bucharest Stock Exchange.

How prime produces battery cells for less cost?

In cooperation with strategic partners, PRIME produces batteries for significantly less cost using the concept of smart factory, innovative manufacturing, reduction of waste, and the simple optimization of locating most manufacturing process under one roof. We expect to lower our battery cells production cost with more than 20 percent.
