Who is MIBA battery systems?

Battery Show North America, 7. - 10. Oktober 2024, Detroit Miba Battery Systems is a pioneer in the development and production of battery packs and energy storage systems on the basis of round cells and battery components. We were the first supplier worldwide to develop an innovative contacting process for welding round battery cells efficiently.

What tests do MIBA battery systems perform?

We have in-house state-of-the-art test rigs to perform functional tests such as life cycle, aging, performance or abuse tests. Miba Battery Systems develops and produces lithium-ion battery packs and energy storage systems based on laser-welded cylindrical cells.

What is MIBA flexcooler &#174;?

This is why Miba develops new solutions for the temperature management of batteries such as the Miba FLEXcooler &#174; for electric vehicles. The battery specialist Voltlabor, now Miba Battery Systems, manufactures advanced battery systems in Bad Leonfelden. Miba develops and produces functionally critical components along the entire energy value chain.

How does MIBA's flexible battery cooling system work?

Miba's flexible battery cooling system now replaces the cooling plate with a heat exchanger that adapts to the shape of the battery cell. The flexibility of the heat exchanger enables direct thermal contact between the heat exchanger and the battery cell, even without the use of a heat-conducting paste. Interested in new battery cooling solutions?

How many MIBA locations are there?

With a Miba network of 30 locations in America, Europe and Asia, we are available to our customers at all times. One of the EU Commission's important strategic goals is to establish competitive European battery production. To this end, it has launched the European battery initiative &quot;EuBatIn&quot;.

What type of battery cooling is compatible with the MIBA flexcooler &#174;?

We'll be happy to explain the Miba FLEXcooler &#174; to you. Our flexible battery cooling is compatible with every cell type on the market, whether pouch, prismatic or cylindrical cells of all formats. The same applies to the cooling direction. The Miba FLEXcooler &#174; can be integrated to cool the bottom, pole, tab or side of any type of battery cell.
